Re: <u>State v. Walker,</u> Case No. B9907154

Dear Mr. & Mrs. Walker:

I regret that we could not have done any better than three years in the penitentiary in John's behalf. His record, as well as the terrible facts, made this a very difficult case.

I told you before that I would be able to do either "a whole lot of something" or "a whole lot of nothing". At first glance, it appears that I was unable to do anything for John.

However, John's court appointed attorney had what I believe to be a hair-brained idea of trying this case and trying to obtain a conviction of the middemeanor offense of negligent assault. I consider this preposterous under these facts and circumstances. And, had this lawyer convinced John to try the case and take his chances, and if John were convicted of felonious assault as charged, Judge Crush would probably have given him more in the range of six to seven years in the penitentiary (rather than three years). So, I think I was at least able to save John from the bad advice of his court appointed attorney.

My work is not yet completed, however. John has a DUI and resisting arrest charge in the county north of Cincinnati that we have to attend to. If we simply let this go, he will be released to Butler County <u>after</u> he serves his three years in prison, and will face additional time for the charges there. What I intend to do, however, is to demand a speedy trial so that these charges are taken care of. Any time imposed on these misdemeanor in Butler County would then, by

operation of Ohio law, then run concurrently (at the same time) as his three years.

While I regret that I could not have done more, Mr. & Mrs. Walker, I assure yeu that we did the best as we absolutely we could under these circumstances. It would have been a disaster to try this case and take our chances.

In any event, thank you once again for your patronage. Best wishes.

Sincerely,

Larry Keller Attorney at Law

Date	Progress Note(s)
10/4/03	Initial intake/eval. time: 45 min. Mr. Walker was seen for unscheduled intake to
	mental health today during the walk-in period. The client is a 53 yr. old, divorced,
	White, male who is requesting mental health services at the request of his mother who he has been living with. He reports that tension between them has been
	mounting as a result of his reliance upon her for support. Mr. Walker reports that
	he had been living with his father but that conflict escalated there too and had
	grown to be too great for him to continue to stay there. He reports a chaotic hx. of
	emotional upheaval, addiction, and medical problems stemming from accidents
	and injuries. The client confirms 8 of 9 sx. of depression at this time including:
	loss of interest, depressed/irritable mood, sleep disturbance, low energy, poor
	appetite, low self-worth, poor concentration, and feelings of restlessness. Mr.
	Walker acknowledges and confirms manic phases as well with elevated/unstable
	mood, hyperactivity, pressured speech, and impulsivity. He relays having been
	brought up in Richmond but relays that he left home during his teenage years and
	only got his GED three years ago while incarcerated. He says that he was dis-
	charged dishonorably from the Army after serving 6 yrs. The client relays that the
	Army had renigged on his contract with them not to serve in combat consequently
	he had gone AWOL. Mr. Walker had joined the Army at age 17. In his adult
	years he has had two marriages which produced two daughters from each mar-
	riage. He relays that addiction has taken its toll on both marriages and that he is
	estranged from all of them now. He does have a sister living in Texas and both
	an adoptive brother and an adoptive sister (deceased). He is hopeful of obtaining
	Disability to resolve financial stress from significant physical limitations. Initial
	dx. impressions are of Bipolar II D/O and a hx. of Polysubstance Dependence.
	An Axis II diagnosis is deferred. The client was provided with an initial med.
	eval. w/ Dr. Lakhani and Ms. Wallace for 10/9/03 @ 3:30 p.m.
